

Hoof and Claw Care

Abrasive disc, ø 115 mm, turned, high density

→ turned version → long durability → suited for angle grinding machines usual in trade

300.0197

Type	Ref.		
Abrasive disc, ø 115 mm, turned, high density	300.0197		

Abrasive disc, turned, ø 115 mm, low density

→ turned steel body on both sides → 2-3 mm graining, low density
→ long durability → suited for angle grinding machines usual in trade
→ high running smoothness

300.0198

Abrasive disc, turned, ø 125 mm, low density

→ turned steel body on both sides → 2-3 mm graining, low density
→ long durability → suited for angle grinding machines usual in trade
→ high running smoothness

300.0199

Abrasive disc, turned, ø 155 mm, low density

→ turned steel body on both sides → covered with hard metal granulate
→ 3-4 mm graining, low density → long durability → suited for angle grinding machines usual in trade → high running smoothness

300.0203

Abrasive disc Semiflex, ø 115 mm, 16 corn

→ Semiflex claw discs are ideal for cleaning claws and hoofs → provides even base for further treatments such as glueing wooden blocs → long durability thanks to waved surface

300.0194

Abrasive disc Semiflex, ø 127 mm, 24 corn

→ Semiflex claw discs are ideal for cleaning claws and hoofs → provides even base for further treatments such as glueing wooden blocs → long durability thanks to waved surface

300.0195

Type	Ref.		
Abrasive disc Semiflex, ø 115 mm, 16 corn, 1 pack = 5 pcs	300.0194		
Abrasive disc Semiflex, ø 127 mm, 24 corn, 1 pack = 5 pcs	300.0195		

Type	Ref.		
Abrasive disc, turned, ø 115 mm, low density	300.0198		
Abrasive disc, turned, ø 125 mm, low density	300.0199		
Abrasive disc, turned, ø 155 mm, low density	300.0203
